

## ACTIVITY 2

## BUILDING BLOCKS

These building blocks can be used with any integers to perform any operation. Fill the bottom row with integers and indicate the operation. Perform the operation on the first two numbers and write the answer in the block above. Pass to the next person and continue until you reach the top. As a challenge, work from a single number in the top row and move down!

**The solutions if using addition are on top, while the ones using subtraction are on the bottom: + / -**
